PROFILE

Software Engineer with nearly 2 years of experience building and shipping Java / Spring Boot and Angular applications, REST APIs and microservices (MongoDB, Kafka, Docker, Kubernetes). Strong foundations in Clean Code, SOLID and testing, complemented by hands-on DevOps and DevSecOps skills (CI/CD with GitHub Actions and Jenkins, Terraform, Ansible, SonarQube, Snyk, OWASP ZAP) and AI engineering experience with LLMs, RAG pipelines and agent workflows (LangChain, LangGraph, ChromaDB, LangSmith). Experienced in Agile / SCRUM teams and international environments.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Data JPA / Hibernate, REST APIs, microservices, Swagger/OpenAPI, Node.js / NestJS

Frontend: Angular, React.js, TypeScript / JavaScript, Bootstrap, HTML/CSS, Figma-to-UI integration

Databases: PostgreSQL, MongoDB, MySQL, ChromaDB (vector DB)

Messaging & Real-time: Kafka, SSE (Server-Sent Events), RabbitMQ (basics)

DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI, Docker, Kubernetes, Terraform, Ansible, Linux (Ubuntu/Debian), Bash

Version Control: Git, GitHub, GitLab, branching strategies, pull/merge requests

DevSecOps & Security: SonarQube / SonarCloud, Snyk (SCA), OWASP ZAP (DAST), OWASP Top 10, OAuth2 / JWT, Keycloak (basics)

Monitoring: Prometheus, Grafana, Zipkin

Cloud & AWS: EC2, S3, CloudFront, ECS / Fargate, API Gateway, Cognito

AI / ML Engineering: LLMs, RAG, LangChain, LangGraph, LangSmith, ChromaDB, prompt engineering, Spring AI, AI agents, LLM API integration

Data: Python, SQL, Power BI, Looker Studio

Code Quality & Testing: Clean Code, SOLID, code reviews, refactoring, JUnit, Mockito, TDD, Selenium

Methodologies: Agile / SCRUM, Jira, Confluence, Trello, technical documentation

PROFESSIONAL EXPERIENCE

Pixalione — Full Stack Java/Angular Engineer Consultant **Sept. 2025 – Present**

Full-time freelance Remote

- Worked as an Angular frontend developer within the Search AI team (searchai-app.com), integrating Figma designs into Angular interfaces and developing AI agents with Spring Boot.
- Worked as a Full Stack Developer within the Typix Neo team (typix-neo.com), contributing to the React.js frontend and Java / Spring Boot backend of an AI content-management platform; developed AI agents with Spring AI and Swagger-documented services.
- Designed a microservice backend using Spring Boot, MongoDB and Docker, and deployed scalable REST APIs in production for external clients.
- Built CI/CD pipelines (GitHub Actions / Jenkins) automating build, test, SonarQube analysis and Docker image delivery.
- Integrated security checks into the pipeline: dependency scanning with Snyk and dynamic testing with OWASP ZAP.
- Provisioned infrastructure with Terraform and automated server configuration with Ansible on Linux environments.
- Built RAG pipelines and agent workflows with LangChain and LangGraph (ChromaDB as vector store), with tracing and evaluation via LangSmith.
- Worked closely with frontend, backend, DevOps and product teams, integrating into their workflows and collaborating on technical decisions, implementation and delivery.

- Participated in peer code reviews and applied Clean Code and SOLID principles, using SonarLint to identify and improve code quality, maintainability and potential issues.
- Contributed to application deployment and production releases, working with containerised applications and deployment workflows.
- Automated Power BI and Looker Studio data flows through REST APIs and service principals for dynamic dashboards.

Pixalione — Data & Backend Engineer **Mar. 2025 – Sept. 2025**
Final-year engineering internship Paris, France

- Designed and built the Java Spring Boot backend of a competitive price-analysis solution over Google Shopping data.
- Microservice architecture (collection, parsing, API) documented with Swagger/OpenAPI.
- Developed a multithreaded large-scale collection pipeline (Jsoup, Selenium) with NLP-based structuring through GPT APIs and normalisation of heterogeneous data at scale.
- MongoDB persistence, unit testing (JUnit, Mockito) and full observability with Prometheus, Zipkin and Grafana.
- Agile teamwork with iterative delivery and reporting through Looker Studio / Power Bi.

RapidGoat — Frontend Developer **Dec. 2024 – Feb. 2025**
Internship, international remote assignment Remote

- UX overhaul in React.js, interactive component development and frontend performance optimisation.

Broadseg — Full Stack Developer **Jul. 2024 – Sept. 2024**
Internship Casablanca, Morocco

- Built an IoT- and RFID-based door access control system with NestJS and Kafka-based event processing.
- Real-time notifications via SSE, containerised deployment with Docker.

PROJECTS

Marketify — Microservice e-commerce platform **2024**
Spring Boot, Angular, MySQL, Docker

- Distributed multi-service architecture with secure payment integration and inter-service communication.

Wander — AI-powered social network for travellers **2024**
Spring Boot, Angular, MongoDB

- Personalised recommendation engine; full-stack design from data model to interface.

EDUCATION

ENSA Khouribga — Sultan Moulay Slimane University **2020 – 2025**
State Engineer's Degree in Software Engineering (5-year programme, Master-equivalent) With Honors

Dakhla High School, Khouribga **2019 – 2020**
High School Diploma — Physical Sciences With Highest Honors

CERTIFICATIONS

Oracle Cloud Infrastructure AI Foundations Associate	2024	Docker & Kubernetes — Udemy	2023
AWS Cloud Quest — Digital Badge	2024	PL-300 Microsoft Power BI Data Analyst	In progress

AWS Cloud Quest: hands-on labs covering core AWS services, including EC2, S3, CloudFront, ECS/Fargate, API Gateway and Cognito.
